Health needs and resources:

Allocation and measurement issues

9-10th November 2023

Topics of the conference

- **Population ageing** in Italy represents a challenge for the **National Health Service (NHS)** in a framework characterized by substantial **territorial differences**, where **many levels of government act simultaneously**.
- Given scarce resources – and loss of purchasing power due to current inflation – **how to allocate public resources** plays a crucial role in **designing efficient and equitable healthcare systems** for individuals, businesses, and institutions.
- Moreover, **identifying and measuring health needs** correctly is fundamental not only for **planning** but also for **evaluating** the system itself.
- The **conference** focuses on all those issues, combining **theoretical and empirical approaches** and proposing original **methods** and assessment **techniques**.

- Resource allocation (Today, h. 16.15–18.45)
- Measuring local needs (Tomorrow, h. 9.30-11.00)
- Information and competition (Tomorrow, h. 11.15-12.45)

Keynote: Prof. Americo Cicchetti

- **New life:** **General Director for Planning @ Italian Ministry of Health**
- **Old life:** **Professor of Organization Theory & Director of Graduate School of Health Economics and Management (ALTEMS) @ Università Cattolica del Sacro Cuore**
- **Research topics:** *Organisation Theory | Healthcare Management | Health Technology Assessment*
